

Summarizing Weather Reports

Listen to the weather reports presented by the different groups. As you listen, decide if each of the following statements is true (T) or false (F). Circle your response. Use the space below each statement to explain your response.

T F **1.** There was precipitation in some part of the United States every day from August 24 to 31.

T F **2.** The hurricane that developed on August 29 reached the state of Texas.

T F **3.** Weather moves from west to east across the United States.

T F **4.** Areas of low pressure can only be found along the coasts.

T F **5.** On August 27, tornadoes developed on the west coast of the United States.
